# Siemens WEISS Spindle Service

Worldwide spindle service - on fair terms

Thorough initial inspection forms the basis for all corrective maintenance

Careful disassembly of the spindle unit ensures cost-effective corrective maintenance

## Portfolio

All elements of the SWSS product range will be discussed, coordinated and offered individually with the customer.

### Repair and maintenance

- of WEISS produced spindle units with standardized processes for maximum technical and economical benefit
- of spindle units from other producers
  - design analysis based on WEISS design guidelines
  - development of technical alternatives
  - production according to WEISS standard processes
  - warranty conditions such as WEISS spindles

### Optimization, modernization and retrofit of WEISS produced spindle units and spindle units from other producers

- analysis of customer needs
- make up general product enhancements towards original design
- optimization based on field experience
- optimization based on individual process requirements of end user

### On site service

- commissioning
- troubleshooting
- small repairs
- diagnostics of bearing condition
- optimization of overall vibration condition

### Supply of spare parts

- usage of original spare parts
- stocking of standard parts, e.g. bearings, clamping systems, rotary unions
- stocking of specific parts
  - also for spindle units from other producers
  - individually according to service agreement

### Service agreements

Individual customer service agreements ensure high machine availability

- minimal clarification effort
- predictable corrective maintenance costs
- available spare parts
- shorter delivery times
- less downtime

The **damage report** provides our customers with valuable details and a list of required new parts and labor

**Machining of parts** is carried out with maximum precision

**Spindle assembly** requires great care and much experience

### Service pool

Repaired spindles on stock - according to service agreement. This service is only available to German customers.

### Training

Increasing machine availability/ efficiency by individual trainings

- storage, startup and operation of spindle units
- maintenance
- small repairs
- optimization
